Hello Jeanne:

Hope this e-mail finds you well.. As promised.. During our conversation after the meeting last Wednesday – I mentioned the European Chemicals Agency (ECHA) REACH website as a good source for finding environmental/mammalian (acute and chronic) toxicity data on various chemistries. It has a database on 7663 unique substances from 30,375 REACH dossiers.

You may already be accessing this information, but I thought I would pass it along to you. If you have any questions, please feel free to contact me..

Thank you for the opportunity to meet with you, Ramona Travato, Drs. Jennifer Orme-Zavaleta and Glenn Paulson and others at the Roundtable discussion..

I hope you have a wonderful Thanksgiving holiday!

Sincerely,
JoAnn
